3. Major BD Support Items

a. Flint, Michigan – Preparing technical report for the jar testing work and our findings to reduce THMs and improve water quality. Technical report will be used to help guide the plant staff and consulting engineer in the improvements necessary for

THM control and water quality maintenance in the system. Assisted in preparation of the written recommendations report for the emergency manager. Worked with the BD team onsite to conduct due diligence for a structured management team proposal we are submitting for Flint. Met with the new City Administrator (Natasha Henderson) to give a plant tour and to briefly discuss our findings for treatment changes at the plant. Finalized chemical costing for the Flint River treatment and for Lake Huron treatment for the cost proposal along with solids production estimates for Jeff Greer to cost model our management team submittal.
